Can I dial 1471 on your VOIP service?

Quickline Talk · https://quickline.co.uk/knowledge/can-i-dial-1471-on-your-voip-service/

No, the conventional 1471 function which advises you which number called you last, is a BT only feature which does not work on our service.

If you want to see who has called you previously, you are best to use the 'history' feature on your digital home phone - if you need further information on how to do this, please refer to your manufacturer's instruction manual included with the phone.
