Do Quickline offer a landline alternative service?

Quickline Talk · https://quickline.co.uk/knowledge/do-quickline-offer-a-landline-alternative-service/

If you're a residential customer with our Full Fibre broadband or Fixed Wireless service, you might wonder, do Quickline offer a landline alternative service?

Yes! **Quickline Talk+** is our easy-to-use landline alternative service. It works using your internet connection and gives you crystal clear, reliable calls without the need for old copper phone lines.

We’re also working hard to bring Quickline Talk+ to our business customers, so keep an eye out for updates soon.

Do I need a new handset or number?

Not at all!

- You can keep using your regular telephone handset – no need to buy anything special.
- You can even keep your current landline phone number and bring it over to us free of charge.

Quickline Talk+ is a super handy landline alternative service. It allows you to use your normal analogue telephone and even keep your number so it really is as simple as switching over.

How do I get it?

Already a Quickline broadband customer?

Great! Complete the online order form to order Quickline Talk+, or give the sales team a call.

New to Quickline?

If you're not with us yet but want broadband and Quickline Talk+ together, give our sales team a call and we’ll help you get set up.

We’re always happy to talk and help you choose the right service for your home. Now you don't

have to worry about the old copper lines being switched off (in 2027), or have to put up with crackling phone lines. You can use our brand new landline alternative service for all of your telephony needs.
