Does Quickline Talk+ support alarms, telecare devices or fax machines?

Quickline Talk · https://quickline.co.uk/knowledge/does-quickline-talk-support-alarms-telecare-devices-or-fax-machines/

No, Quickline Talk+ does **not** support alarm systems, telecare (lifeline) devices, fax machines, modems, card readers, or any other analogue equipment.

These types of devices are designed to work over traditional copper landlines. Because Talk+ runs over a modern digital connection, it doesn’t support this older technology.

If you rely on any of these services, we recommend speaking to your provider to explore alternative solutions that work over broadband or mobile networks.
