Feature access codes for Quickline Talk+

Quickline Talk · https://quickline.co.uk/knowledge/feature-access-codes-for-quickline-talk/

Manage your Quickline Talk+ features instantly using simple phone codes—no need to call technical support.

You can activate, deactivate, and customize Quickline Talk+ features directly from your phone handset. Simply dial the codes below and press the call button to make changes immediately.

How to Use Feature Access Codes

Enter any code below on your phone keypad, then press the call/dial button. The feature will activate or deactivate instantly.

Voicemail Access Codes

Turn voicemail ON: Dial `*41`
This directs unanswered calls to your voicemail inbox.

Turn voicemail OFF: Dial `#41`
This disables your voicemail service.

Call Forwarding Codes

Enable call forwarding: Dial `*92` followed by the destination phone number
Example: `*921482247365` will forward calls to 01482 247365

Disable call forwarding: Dial `*93`
This returns calls to your phone. If you previously had voicemail enabled, dial `*41` after `*93` to reactivate it.

Anonymous Call Rejection

Block anonymous calls: Dial `*77`
Prevents calls from withheld or unknown numbers from reaching you.

Allow anonymous calls: Dial `*87`

Turns off anonymous call blocking.

Voice Portal Access

Access voice portal: Dial `*62` or `1571`

Both codes connect you to your Quickline Talk+ voice portal for additional settings and options.

Check Your Current Settings

View voicemail settings: Dial `*61*`

Confirms whether voicemail is currently active on your line.

Check anonymous call rejection status: Dial `*52*`

Shows whether anonymous call blocking is turned on or off.
