Is a Quickline service available at my address?

Frequently Asked Questions · https://quickline.co.uk/knowledge/is-a-quickline-service-available-at-my-address/

To see a Quickline service is available at your address just enter your postcode in our handy Postcode/Availability Checker.

- If we can connect you, the postcode checker will present all the broadband packages available at your address. You can then go ahead and place an online order for the one that suits you best.
- The options available will depend on where you live, as we use different broadband technologies across our network.

If we don’t offer a Quickline service at your address don't worry, the postcode checker will allow you to register your interest. We’d encourage you to do this as:

- We’re expanding our network all the time, and if we have your details, you’ll be the first to know when services will be available in your area.

- We also use registrations of interest to help us decide on network expansion areas – so if there’s a need for faster, more reliable broadband in your community, why not encourage your neighbours to register their interest too?

To learn when a Quickline service becomes available within your area, follow us on Facebook for the latest news and updates.
