What speeds should I expect with Wi-Fi Everywhere?

Wi-Fi Everywhere · https://quickline.co.uk/knowledge/what-speeds-should-i-expect-with-wi-fi-everywhere/

What speeds should I expect with Wi-Fi Everywhere?

Wi-Fi Everywhere is built to give you strong, reliable speeds in every room of your home. This article explains what Wi-Fi Everywhere speeds you should expect and what to do if your speeds don't seem right.

Great Speeds, Guaranteed

With Wi-Fi Everywhere, you can count on fast, reliable wireless internet throughout your entire home. We guarantee a minimum of **25Mbps download speed in every room** – no weak spots, no dead zones, no frustrating dropouts.

But that's just the minimum! You'll often enjoy much faster Wi-Fi Everywhere speeds, especially when you're near your router or mesh access points. Whether you're streaming, video calling, gaming, or browsing we'll make sure you stay connected with a smooth, stable connection.

What Wi-Fi Everywhere Guarantees

Wi-Fi Everywhere speeds include:

- **At least 25Mbps wireless download speed** guaranteed in every room
- **Automatic connection** to the strongest signal as you move around
- **Consistent performance** for all your online activities

Factors That Affect Your Wi-Fi Everywhere Speeds

Your actual speeds with Wi-Fi Everywhere may vary depending on:

- **Your broadband package** – Wi-Fi Everywhere can't exceed your plan's maximum speed
- **Number of devices online** – More devices sharing bandwidth reduces individual speeds
- **What you're doing online** – Different activities use different amounts of bandwidth

- **The device you're using** – Older devices may have slower Wi-Fi capabilities

With Wi-Fi Everywhere, your connection should be fast and steady wherever you are in your home, often performing even better than the 25Mbps minimum.

How to Check Your Wi-Fi Everywhere Speed

Want to test your Wi-Fi Everywhere speeds? It's easy:

1. **Stand in the room** you want to test
2. **Open a speed test** – Search "speed test" in your browser or use speedtest.net
3. **Tap "Go" or "Start"** and wait for the result
4. **Check the download speed** – it should be at least 25Mbps

If your Wi-Fi Everywhere speed is under 25Mbps in any room, contact us and we'll investigate and if it's a fault we'll fix it under our guarantee.

What You Can Do with 25Mbps Wi-Fi Everywhere Speeds

Here's what the guaranteed 25Mbps Wi-Fi Everywhere speed lets you do:

Streaming

- Watch HD video on Netflix, YouTube, Disney+ with no buffering
- Stream music and podcasts without interruptions
- Join live streams or webinars smoothly

Video Calling

- Run high-quality Zoom or Teams calls (even group calls)
- Use video chat apps like FaceTime, WhatsApp, Google Meet
- Host or join family video calls

Gaming

- Play online multiplayer games (low latency is more important than speed here)
- Download updates or game files (large ones may take longer)
- Stream gameplay to platforms like Twitch

Browsing & Social Media

- Browse the web quickly and smoothly
- Use social apps like Instagram, TikTok, and Facebook without lag
- Upload and download photos and videos with ease

Working & Studying from Home

- Send and receive emails with large attachments
- Access cloud-based apps like Google Drive, Microsoft 365, Slack
- Stream training videos or online courses
- Join virtual meetings without interruption

Even Better Speeds in Most Rooms

Remember, 25Mbps is the minimum guaranteed Wi-Fi Everywhere speed. In most rooms, especially those closer to your router or mesh access points, you'll see significantly faster speeds – often matching your full broadband package speed.

We're Always Here If You Need Us

If your speed isn’t where it should be, or something doesn’t feel right, just get in touch. We’ll work with you to get it sorted. Contact our technical support team.

We'll work with you to get your Wi-Fi Everywhere speeds back to where they should be under our guarantee.
